

GFCI Outlet Tripped

Reset Button – push this in to reset the outlet to restore power

Please note that your bathrooms/kitchens are equipped with GFCI (ground fault circuit interrupter) outlets for safety and this may need to be re set to restore electricity. The re-set button will be located in the middle section of the electrical outlet, once this is pressed a small green LED light will turn on meaning that electricity is available again. Your unit may be on the same circuit meaning that if the outlet reset button is not located in one of the bathrooms it will be in the other one.

#300 – 550 Robson Street, Vancouver British Columbia, V6B 1C1
